

AIR|SHIELD[®] SOLUTION FOR WINE & SPIRITS

Traditionally, wine suppliers spend time, effort and money developing packaging solutions that convey brand image, quality and value of the product to a discerning audience, shipping this precious commodity through an unforgiving courier network!

Quite often, on more occasions that we'd like to admit, damage on arrival (DOA) becomes an all too familiar and expensive statistic. The commercial cost of returns is quickly followed by poor customer feedback and a negative experience, a scenario GAIA call the 'DOA Double Whammy'!

Our belief in our product is supported by strong customer testimonials and rigorous independent International Safe Transit Association (ISTA) testing.

Our unique, inflatable AIR|SHIELD™ core packaging solutions have been designed to protect goods in the most challenging courier networks; original solutions developed in Consumer Electronic aftersales support sectors were designed for 70" flat screen TV's within courier networks. You can be sure your product will be secure!
